My Blue Collar Town- MADE IN USA

The United States of my youth was a much different country than it is today. I grew up when America was in her prime. The nation had become the most successful engine for prosperity the world had ever known. Before "globalization" and "Free Trade," just about everything Americans owned was manufactured, mined, logged, invented, grown, harvested, and produced right here at home.

Before my university years, I lived in typical, rural America. In my blue collar town, I cannot remember ever seeing a man without some kind of job. Families were larger then; but most households needed only one income to pay the bills. My father worked long hours to expand his business every year. Mother was home teaching us children how to work.

Mom was frugal and we were her work crew. If she could sew it, can it, compost it, mend it, save it, or grow it, she would. Besides keeping up with our daily chores, my brothers and I did all kinds of odd jobs around town from the time we could walk to school. (I earned 50¢/hr. for 'spending money' and college savings.)

In those days, scholarships were for *scholarship* and competition was fierce. Our local businesses and civic groups sponsored college scholarships for home-town high-achievers [state tuition was less than $300 per year]. My brothers and I really 'burned the midnight oil' to prepare for tests and to maintain high grade point averages. Students who graduated 1st, 2nd, or 3rd in class were awarded their monetary prizes at

graduation ceremonies attended by the entire community. Back then, a university degree was an instant ticket to a promising career. *It was automatic.*

Thrift, Savings, Sound Money

When I was a girl, hardly anyone used credit cards. Most Americans paid for things with checks or cash. Coins were *real* silver: a night at the movies was 25¢; a gallon of gas was less (and a man would pump the gas, check the tires and oil, and wash the windows); a visit to the town doctor was about $3.50 (for a check-up or a shot). Back then, local 'Mom and Pop' businesses lined the main street (grocery store, drug store, variety store, feed store, and hardware store). All of the merchandise sold in our small town had been produced by *home-grown* manufacturers.

Everything we used at home was American-made: radios, televisions, bicycles, record players, tape recorders, musical instruments, typewriters, sports equipment, and games. Our school clothes, fancy dresses, suits, work clothes, Mom's fur coat, the horse's saddle, and everybody's hats and shoes were manufactured in the good old U.S.A.

Dad's trucks, tools, heavy machinery, cars, tractors, tires, heavy equipment, shop buildings (made of aluminum, concrete, steel, brick, and lumber), the house appliances, fencing, plumbing fixtures, light fixtures, copper wiring, windows, curtains, bedding, flooring, indoor and outdoor furniture, kitchenware, rugs, and lawnmowers were MADE IN USA.

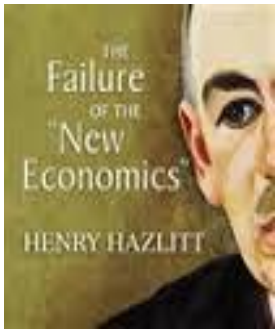
In those days, America had a reputation for fair-dealing, a *can-do* spirit, and Yankee ingenuity. Not only were we the greatest *creditor*-nation, the United States was the *land of the free*. We were so proud of our heritage and of the brilliant heroes who had sacrificed for the cause of liberty: the nation's Founding Fathers, George Washington, and Abraham Lincoln.

But most of my youth, I lived with one nagging fear: *Sea-level was about to drop!* Prominent scientists were predicting a coming ice age. In *Newsweek*, it showed the drastic drop in the world's temperature [http://www.denisdutton.com/newsweek_coolingworld.pdf]. At school, my *Weekly Reader* pictured frozen oceans and the island of Manhattan completely covered with icecaps. Special reports on C.B.S. said the ice could overwhelm the entire planet! I imagined the worst whenever I heard Walter Cronkite's dire warnings about the coming global chill. (Later, I read the CIA's *"Report from Iron Mountain*;" and it all made sense.]

Fifty years ago, the U.S. was transformed into a growth-engine for debt. We are now the greatest *debtor*-nation. *Why?* Money changed.

In the 1920s, Lord John Maynard Keynes introduced a new economic model to the world. Keynes believed the *"gold standard"* was a barbaric relic of the past. His new economic system would allow governments to *gradually cut* previous ties between their national currencies and their gold reserves. Before World War II, the British economist's ideas infected academia. After the war, indebted and war-torn nations (with meager gold reserves) were eager to adopt his theories.

Although the U.S. Treasury held title to about 4/5^{ths} of the official world gold reserves [20,000 tons after WWII], Ivy League economists insisted we needed an *elastic* money supply. By controlling the supply of money (raising/ lowering interest rate charged to banks), the Federal Reserve would be able to level out the peaks and valleys (booms and busts) of the business cycle. The idea was that by creating money out of thin air, business spending and consumer spending could be artificially stimulated. A *little bit of inflation* would solve everything.



In 1971, President Nixon ended the gold-backed dollar (creditors could no longer convert dollars to gold). Without gold's discipline, the Federal Reserve was free to create credit without restraint. Politicians were delighted with the prospect of spending with an unlimited 'credit card.' Since then, our elastic money supply has enabled non-stop war and an exponential rise in debt. **America is now reaping the consequences of this economic folly.**

Economic Laws Never Change.

Throughout history, bloated governments have always resorted to the printing-press to pay their bills. But in every case, all attempts to circumvent financial laws end in disaster. In the long-term, the laws of money prevail:

> *"Every other attempt of the same kind in human history… show the existence of financial laws as real in their operation as those which hold the planets in their courses."* [Andrew Dickson White, 1896.*]

FINANCIAL LAWS

Gleaned from "*Economics in One Lesson"* by long-time *New York Times* economics editor Henry Hazlitt and "*The Road to Serfdom"* by Nobel Prize winner F. A. Hayek.

LAW: Government cannot grow an economy. The only thing government can grow is more government. Government can encourage business and encourage hiring by lowering taxes and reducing regulations.

LAW: Excessive money printing by a central bank (to cure recession) creates the boom of the business cycle. When the money spigot is turned off, a recession (bust) cannot be avoided. Stops and starts become more violent, more frequent, and more destructive.

LAW: The more an economy is artificially stimulated by credit expansion, the longer it takes to recover. Money-printing prolongs depressions. The more government is allowed to take over and run an economy, the deeper the depression gets and the longer it lasts.

LAW: Artificially low interest rates create distortions in wages, costs, and prices. Rates below the natural market are made possible by inflating the money supply. Cheap money discourages thrift and the accumulation of capital for investment. Easy money encourages speculation, slows down production, and brings about violent business oscillations.

LAW: In the near-term, cheap money benefits favored groups [state contractors, stock brokers] and leads to the over-expansion of some industries at the expense of others.

LAW: If government projects are paid for by deficit spending instead of direct taxation [collected taxes], the nation only seems to have gotten something for nothing. Deficits are paid by the money printing tax.

LAW: Government can give no financial help to business that it does not first take from business. Government loans or subsidies to business are a tax on successful private businesses in order to support unsuccessful private business. In the end, government loans waste capital and reduce production.

LAW: Government loans are harmful. Government makes loans to people who would not get them from private lenders, encouraging people to buy what they cannot afford. That raises everyone's costs. Government loans mislead recipient industries to over-expand and produce over-supplies. Tax-payers must defray all losses.

LAW: For every public job created, one private job is destroyed. For every dollar the state spends on public works, taxpayers have one less dollar to meet their own expenses.

LAW: Frederic Bastiat's "broken window fallacy" explains why war diminishes a nation's wealth. War requires immediate funding. Capital is used to provide war materiel instead of being used to invest in productive enterprises. Funds used for war are funds that could have remained in the economy to raise the standard of living of the society.

The *real* cause of most depressions is the combination of government debt, high taxation, and money-printing. The *larger* the percentage of the national income taken by taxes, the *greater* the deterrent to private production and employment. Higher taxes mean more business failures.

ECONOMICS 101:

- Government does not produce anything. All government expenditures are paid by taxation – whether by direct taxation or by indirect taxation.
- Anything taxed is discouraged and therefore decreases. The more you tax it, the less you get.
- Business regulations are an indirect tax.
- When businesses are over-regulated and over-taxed, production is discouraged and unemployment worsens.

- As unemployment rises in the private sector, a nation drowning in debt uses the printing-press to pay for rising welfare rolls, public works, and bail-outs (too-big-to-fail banks and corporations).
- Money-printing is a form of indirect taxation. When government uses printing-press-money to pay its bills, higher prices for goods and services are the result.
- Higher costs hurt companies' bottom lines and cause businesses to fail.
- The cycle of more debt and more money printing is repeated: QE1, QE2, QE3.

The same principles that work for a home bring prosperity to a nation: *"What is prudence in the conduct of every private family can scarce be folly in that of a great kingdom."* [Adam Smith, *The Wealth of Nations*, Book IV, Chapter II, pp. 456-7, 1776; condensed by Eamonn Butler, Adam Smith Institute.]

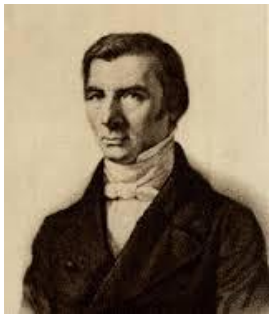
Nations and individuals can ignore financial laws in the short-term. A householder can spend more than he takes in for years. If his credit is good, he can go right on spending until he becomes accustomed to working most of the year just to pay the interest on his debt. However, an individual begins to sink when his debt reaches a critical point. Then he must pile on evermore debt, faster and faster — just to keep going and maintain a public façade. The big spender appears to be prosperous until the day his creditors raise his rates so high, that he is forced into bankruptcy.

END NOTES

* Andrew Dickson White, "*Fiat Money Inflation in France*," p. 63, 1896. Read about the French *assignat* (and the dollar's future) at Mises.org: "Fiat Money Inflation in France."

Greek: *oikonomia*=economy; *oikos*=household/property; *nomos*=law.

ECONOMY [law of the household]: *"The judicious government of the pecuniary concerns of a household — thrifty, saving, incurring no waste."* [Webster's *New Twentieth Century Dictionary*, George W. Ogilvie, USA, 1904.]



Suggested reading:

The Law by Frederic Bastiat, The Foundation for Economic Education, Irvington-on-Hudson, New York, [the pamphlet by this French statesman and economist was first published in 1850].

"*Inflation in One Page*" by Henry Hazlitt, *The Freeman*, Vol. 28, Issue 5, May 1978, the Foundation for Economic Education.

Liberty vs. "Homeland Security"

According to President James Madison (*Father of the U.S. Constitution*), when citizens are terrified, they will sacrifice liberty for security every time. People have always lost their freedom at home because of real or pretended foreign danger:

> *"Perhaps it is a universal truth that the loss of liberty at home is to be charged against provisions against danger, real or pretended from abroad."* [James Madison, letter to Thomas Jefferson, May 13, 1798, *Letters and Other Writings of James Madison* (Philadelphia: J. B. Lippincott & Co., 1865), Vol. II, p. 141.]

Throughout history, tyrants have used an emergency rationale to justify power grabs. James Madison said despots have always manipulated their citizenries by creating national emergencies. The self-inflicted acts of terror convince people it is necessary to hand leaders *'war powers'* to remove the threats to their security:

> *"Crisis is the rallying cry of the tyrant. Tyrants use real or pretended crises to seize more power… The means of defence against foreign danger have been always the instruments of tyranny at home. Among the Romans it was a standing maxim to excite a war, whenever a revolt was apprehended. Throughout all Europe, the armies kept up under the pretext of defending, have enslaved the people."* [James Madison speech, June 29, 1787, *Records of the Federal Convention of 1787*, by Max Farrand, Yale Univ. Press, New Haven, 1911, Vol. I, p. 465.]

Lenin hired violent thugs to create an atmosphere of anarchy. Hitler and Nero arranged for their own capitals to be set ablaze [German *Reichstag*, city of *Rome*]. In these historical examples of *self-inflicted terrorism*, citizens handed over their freedoms to the very ones responsible for creating the problems. People rallied behind the tyrants against the demonized groups they blamed. *The formula is simple:*

> CREATE PROBLEM: lawlessness, economic collapse, or a phony attack.
> (*False flag* is a CIA term for *self-inflicted* terror blamed on another group.)
> TARGET SCAPEGOAT: Use propaganda to teach citizens to fear certain groups of people. Use media to inflame public emotion against the scapegoat.
> PROVIDE SOLUTION: Executive Orders, War, Martial Law (rights suspended).

MARTIAL LAW. The rights of Americans are not *alienable*. Under NO circumstances is a *lien* on una*lien*able rights ever justified. The Bill of Rights says the government may never cross that line. Infringement on our rights is un-Constitutional.

***Has our government ever suspended the rights of American citizens?* YES.**

The rights to life, liberty, and private property of tens of thousands of tax-paying Americans were *suspended* from 1942 to 1946. President Franklin D. Roosevelt's Executive Order 9066 [Feb. 19, 1942] targeted persons of *"enemy nationalities"* (including citizens). Executive Order 9095 gave authority over all their property.

> American citizens were "*detained"* (four to five years) in prisons President Roosevelt called "CONCENTRATION CAMPS" – *"to protect against domestic espionage and sabotage."* American families were *denied* due process and legal protections guaranteed by the Constitution. Thirty years later, it was officially concluded there was *never one documented incident* of espionage or sabotage by *one* of those who had been incarcerated.

The U.S. military imprisoned citizens and legal residents of "*enemy ancestries"* [Japanese, Germans, Italians, German and Japanese Latin Americans, and other Europeans]. More than 2/3rds of the more than 130,000 Japanese arrested were citizens; the rest were legal resident aliens. Half of those were children, infants, and young people under voting age. Of the 11,000 Germans who were detained, more than 10,000 were imprisoned (including citizens and individuals born in America). Of the 3,200 Italian resident-aliens arrested/ detained more than 10% were imprisoned. Many citizens who had *not* been arrested joined their families in the prisons.

The government's betrayal caused permanent damage in many ways: Families were separated; a number of persons died from lack of medical care; some died from extreme anguish; prisoners were shot by sentries for various infractions; and others committed suicide because of their shame. The mental and physical trauma caused by painful years of captivity continues to affect thousands of Americans to this day. It has been documented the average prisoner's lifespan was shortened. Today, the general population of former prisoners continues to experience a much higher incidence of cardiovascular illness and other diseases.

People incurred overwhelming financial loss. They lost their livelihoods and irreplaceable personal property and other property. After they were arrested, many had to sell their businesses, homes, and property in just a few days.

PICTURES of FASCISM

Prisoners being loaded into these box-cars [below left] are not on their way to *Auschwitz*, *Buchenwald*, or *Dachau*. Scores of thousands of hard-working American citizens were loaded onto box-cars headed for concentration camps.

All of the prisoners were forced to live in extreme privation under Martial Law without adequate nutrition, warmth, or healthcare. Their tar-papered huts had no plumbing or cooking facilities. The last camp was closed in 1946. [Above right: Prison for Americans with barbed wire and armed guards in British Columbia, Canada.]

Would Americans clamor for unconstitutional laws if they believed they were threatened? **YES.** Thirteen days after Sept. 11th, 2001, Congress passed legislation that violates the protections itemized in the Bill of Rights:

Under the *Patriot Act,* Americans may now be jailed indefinitely without charge, and *denied* legal representation, witnesses, and speedy public trials. Under this legislation, freedom of speech and association may be limited. The Patriot Act authorizes NSA

surveillance; airport TSA pat-downs/ full-body scans; CIA Targeted-Assassination of citizens; search and seizure of *all forms of communication:*

ALL RECORDS from ANY American may be seized without a warrant, without probable cause, without a charge, without judicial oversight (medical records, purchases, credit cards, driver's license, hotels, bank, travel, car rental, apartment leasing, school transcripts, rentals, telephone). FISA [*Foreign Intelligence Surveillance Act*]: Authorizes seizure of your internet logs, service provider info, library records, and ALL other papers; Monitors and STORES financial and Internet data; Legalizes wiretaps; Authorizes "Sneak and Peak" (secret bugging, secret searches of Americans' residences or businesses when the owners or occupants are away).

> *"The dark side to gathering such a broad, seemingly un-targeted, amount of information is obvious. It is the height of naiveté to think that once collected this information won't be used."* [Matthew Schofield, June 26, 2013, McClatchyDC.com]

The NDAA [*National Defense Authorization Act*]: Authorizes domestic deployment of the *military* as law-enforcement and *military arrest* of citizens. Americans may be held indefinitely without probable cause, charges, evidence, or legal counsel. Since September 11th, 2001, we have seen tanks and mercenary soldiers [*Blackwater Xe*] in neighborhoods [MA, CA, NY, FLA, LA]; ID *checkpoints* on our highways, NATO jets patrolling U.S. air-space. Most alarming: Subsidiaries of Halliburton have built 100s of detention camps for FEMA [*Federal Emergency Management Agency*].

For more than 200 years, *local* police were the hallmark of our American system of justice. Today, we have a *federalized* police force. Local law enforcement authorities have been co-opted by *Homeland Security* [DHS] authorities, with highly-trained combat troops drilling for urban warfare. (The *DHS* is armed with 30,000 domestic spy and armed drones.)

Today, the *Department of Homeland Security* lists 72 categories of Americans as *"Potential Terrorists."* (Political criticism is now considered *"Low-Level Terrorism"* and is tracked by *General Dynamics*.) Is the Department of Homeland Security preparing for the "*detention*" of specific groups of people in the next big war?

Do You Recognize Fascism When You See It?

The ancient Roman term "Fascism" has traditionally referred to a form of government and a specific economic theory. This form of Collectivism is called *"The Third Way"* because it is neither communism nor laissez faire capitalism. Although people find NAZI racism repugnant, most favor the *economics of Fascism* without realizing it.

ECONOMICS OF FASCISM

- State control of boom/bust cycles with credit-expansion by the central bank
- Government – corporate partnerships [public – private]
- Public works projects to achieve full-employment
- Private sector bail-outs of banks and corporations
- Government build-up of key sectors for military expansion
- State – school cooperation to satisfy workforce goals
- Sweeping, government-imposed energy policy
- Government subsidies of key industries [such as automobiles, farming]
- Government take-over of investments and retirements
  (citizens are forced to buy government bonds).

The Fascist economic model allows private businesses and private property; but through regulations, the state decides how the property is used. Rather than outright confiscation, government *controls* assets for the 'good of the community' by indirect taxation [regulations, cronyism, money-printing], direct taxation, and by top-down control over the means of production — who, what, when, where, and how.

Fascists want total control of the economy so wealth can be redistributed to the 'little people.' Italy's Benito Mussolini [*"Il Duce,"* 1922-1943] believed government *alone* can properly determine how much money should be spent for the general welfare of society. According to Mussolini's philosophy, the state should manage all economic activities *'for the greater good of the greater number.'***

Under Fascism, the interests of the *individual* are subordinate to the interests of the *collective* [the community]:

> *"If classical Liberalism spells Individualism, Fascism spells government… Against Individualism, the Fascist… is for the State… opposed to Classical Liberalism… Liberalism denied the State in the interests of the particular individual…For the Fascist… nothing human or spiritual exists, much less has value outside the State. In this sense Fascism is totalitarian…."* [Benito Mussolini, "Fascism Doctrine and Institutions," *Enciclopedia Italiana*, 1932.*]

THE FASCIS

The "fascis" is a bundle of wooden rods bound together with *or* without an axe. On verbal command, ancient Roman bodyguards [*lictors*] used the lethal weapons to subdue opposition. Then and now, the fascis *signifies* the perennial power and authority of Rome. The fascis *symbolizes* unopposed, absolute rule:

> "The Fascist State… *wants to… enter into the spirits of men and there govern unopposed. Its sign, therefore, is the Lictors' rods…."* [Benito Mussolini. *]

Fascists use state authority to resolve inequalities in society. The government transfers wealth from individual savers, private property owners, entrepreneurs, and productive members of society to eliminate inequality. Property is forcibly redistributed for the common good. The rights of the individual are transferred to the *community* – to achieve *social* justice, *social* prosperity, and *social* equality.

COLLECTIVISM • ECONOMIC EQUALITY

In the Fascist State, central planners force the fortunate members of society to serve the collective. The *anti-social*, *selfish*, and *greedy* must "*pay their fair share*" and "*give back*" to the community:

> *"The citizen in the Fascist State is no longer a selfish individual who has the anti-social right of rebelling against any law of the Collectivity."* [Benito Mussolini, *My Autobiography*, p. 280, Scribner's, New York, 1928.]

NAZI is short for "National Socialism" [*National Sozialistische Deutsche Arbeiter Partei*]. Adolf Hitler's political party grew out of the *National Socialist Labor Party* and the *German Workers' Party*.*** The campaign posters *below* were for National Socialism candidates. On the left it reads: "We women are voting National Socialism." On the right, a 'worker' is chained to a swastika in Hitler's "*Reich des hakenkruezes.*" Translation: "*The worker in a kingdom of hooked crosses! Therefore Choose List 1 — Social Democracy!*"

"*Either the world will be ruled according to the ideas of our modern Democracy, or the world will be dominated according to the natural law of force....*" [Adolf Hitler, *Mein Kampf,* 1925; (George Seldes, *Great Thoughts*, 'H,' Oct., 1984, Vermont).]

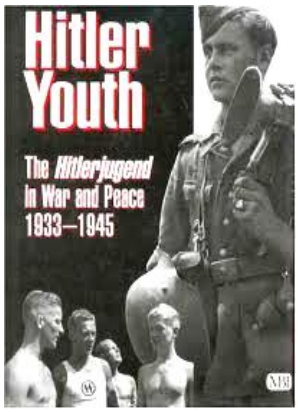
THE COLLECTIVE WILL [*volonté générale*]

National Socialism claimed to represent "*the organized will of the nation"* [National-Sozialismus der Organisierte Wille der Nation]. The NAZI party promised a completely *classless* society. The guiding principle of the party was '*The good of the many is more important than the good of the individual.'* The party promised that their *"people's community"* [*volksgemeinschaft*] would become a modern-day Sparta through training and self-sacrifice.

Hitler believed social equality would be achieved by state control of private wealth and industry. By combining social democracy with nationalism, the Führer skillfully used propaganda to *collectivize* Germany: "Public interest goes before individual interest" [*Gemeinnutz geht vor Eigennutz*] was National Socialism's most effective slogan.

COLLABORATION • COMMUNITY SERVICE • UNIFORMITY

Individualism was stripped away, and replaced with '*group think.'* Young people were '*socialized'* via the Reich's nationalized school curriculum, the national Reich Church [*Reichskirche*], mandatory community service and membership in *Hitler Youth* [*Hitlerjugend*]. Students were indoctrinated during group activities. At an early age, children were taught it was their civic duty to sacrifice personal liberty and individual property rights for the '*homeland security'* of the Fatherland.



EARLY CHILDHOOD EDUCATION: "…the concept of the State must be striven for by the school [*Staatsbürgerkunde*] as early as the beginning of understanding… within the framework: *The good of the state before the good of the individual."* ["NAZI Party Platform," Feb. 24, 1920*, Wikipedia*.]

SOCIALIZATION: In one generation, German society was transformed from Individualism to Collectivism. Hitler asked, *"Why need we trouble to socialize banks and factories? We socialize human beings."* ****

Hitler
• Nationalized healthcare
• Nationalized school curriculum
• Imposed an IBM national I.D. system
• Imposed the National Reich Church [*Reichskirche*].

Hitler and Mussolini were called 'Progressives' by U.S. media. Mussolini graced the cover of "Time" magazine on July 20, 1936. "Time" named Hitler their "Man of 1938."

STATE CAPITALISM. Italy's state-driven economic model was similar to Germany's state-controlled economy [*Zwangswirtschaft*]. Both governments were giant bureaucracies that regulated everything (planning boards dictated production requirements). All economic activities required government permission. Both *command economies* ended in debased currencies and paralyzed production.

PUBLIC/ PRIVATE PARTNERSHIPS. The governments formed partnerships with private businesses. In this system of crony-capitalism, chosen enterprises received subsidies, tax breaks, and tariff protection, and were exempt from many regulations. The Fascist confederations were state-dependent [Banking, Agriculture, Commerce, etc].

PUBLIC WORKS. Both governments used *massive* public works projects to eliminate high unemployment and create the illusion of prosperity. The largest program was the military (arms, materiel, and men conscripted for military service and non-military work).

BAIL-OUTS. The governments took over the banks [1939]. Tax-payers were forced to bail out banks and big corporations [most failing big businesses were government-contractors].

MONEY-PRINTING/ INCREASED TAXATION. The states paid for their war machines, public works programs, and corporate bailouts with printing-press-money and confiscatory taxes on businesses. (The requirement to back bank notes with foreign currency and gold was removed; the currencies were backed only by *'treasury notes.'*)

WAGE/ PRICE CONTROLS. To prepare for war, tremendous money-printing caused sky-rocketing prices. Then the governments imposed wage and price controls to stabilize economies, which then caused food shortages.

CAPITAL CONTROLS. Mussolini and Hitler banned gold purchases by private citizens. The governments took total control of investments [including pensions/ retirement funds], and the lion's share of credit was controlled by the state. To finance out-of-control spending, citizens were forced to buy government bonds.

STARVATION. Paper money backed only by *treasury notes* lost all purchasing power [the currency no longer functioned as money; people resorted to barter]. Men, women, and children starved because of their worthless currency.

THE 'ECONOMIC MIRACLE'

The Third Reich was an economic *basket-case*. But only twenty years after Hitler, West Germany became the world's third largest manufacturing economy. *How in the world did that war-torn country pull itself out of the rubble?* Many believe the Marshall Plan brought West Germany out of economic collapse. However, they are mistaken. Although East Germany received massive aid, that country *remained* desperately poor under socialism.

The West German economy flourished because of an economics professor named Ludwig Erhard. Professor Erhard became Minister of Economic Affairs for the American-British occupation zones in 1948. Erhard understood that maximum productivity would result from maximum economic freedom. So he *reversed* the official policies of the Allied Authorities:

- He reduced the money supply by more than 90%;
- Cut taxes drastically;
- Abolished food/ fuel rationing;
- Abolished wage/ price controls;
- And he got rid of all manner of business regulations [Erhard – von Mises Institute].

The West German economy was transformed almost overnight. After Professor Erhard restored the Deutsche mark, the barter system and black markets disappeared. The revival of the nation's market place was called "*wirtschaftswunder*" — the *economic miracle*.

END NOTES

* Benito Mussolini, "Fascism Doctrine and Institutions," (*Enciclopedia Italiana*, 1932), *The Social and Political Doctrines of Contemporary Europe*, pp. 164-8, Cambridge University Press, 1939; [via Michael Oakeshott, CaptainJamesDavis.net].

** Although the United States was founded on the principle of unalienable, *individual* rights, the majority of Americans have become '*socialized*.' Today, most academics believe societal problems can be resolved by a strong central government that controls and redistributes private wealth for the greater good.

*** Professor Rudolf Jung, The National Socialism: its Foundations, its History and its Objectives [*Der Nationale Sozialismus: seine Grundlagen, sein Werdegang u. seine Ziele*], München, German People, Dr. E. Böpple, 1922.

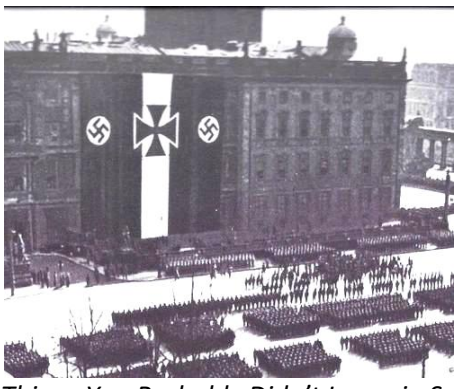
**** Foundation for Economic Education, F. A. Harper, *Roots of Economic Understanding*, 01-Nov.-1955 – FEE.org/ the Freeman (Hermann Rauschning, *The Voice of Destruction*, pp. 192-195, G. P. Putnam's Sons, New York, 1940).

No wonder people do not recognize fascism when they see it – the definition was changed! The following is the age-old definition I learned in school (notice the date – Hitler and Mussolini did *not* invent Fascism):

> FASCISM [**1904**] *"The retention of private ownership of the means of production under centralized government control."* [Webster's New Twentieth Century Dictionary, unabridged, George W. Ogilvie, USA, 1904.]
>
> FASCISM [**2012**] *"An authoritarian and nationalistic right-wing system of government and social organization. Extreme right-wing, authoritarian, or intolerant views or practice."* [*Wikipedia,* 2012.]

SYMBOLS of FASCISM

The swastika ["*hooked cross*," *hakenkrueze*] and the Maltese cross [*Malteserkreuz*] were the powerful symbols of Adolf Hitler's occult Eugenics doctrine.



From remotest times, these religious tokens have been used in connection with the worship of the sun. Greeks and the Romans borrowed the *Magian* system from ancient Babylon and Assyria.

The Real Face of the European Union & North American Union.

Why did the British people vote in favor of BREXIT? There has been a drastic withdrawal of public support for the *immigration* and *economic* policies of the European Union [EU]. The majority want to exit the EU because England has been economically devastated by EU mandates that have redistributed wealth to less productive members. Although most British people want to regain national independence, it may be too late for them to throw off international governance; the BREXIT is being *delayed*.

SUPRA-NATIONAL GOVERNMENT IS UN-DEMOCRATIC.

Europeans are discovering that EU leaders (in Brussels) are *not* responsible to voters. *Regional* government means rule by the *unelected*. Europeans now have no voice when EU bureaucrats impose "*integration"* of cultural policies: health, social security, environment, social/worker policy; local regulations; caps on residential electricity (energy rationing); rules and regulations for telecommunications, radio, television, and the internet; and, especially *immigration policy!*

In the 1950s, treaties were sold to the public as agreements to facilitate trade among European nations. By a series of *increasingly* totalitarian treaties, sovereignty was incrementally transferred to the EU. Today, 80% of the laws being imposed on Great Britain are created in The Hague [the EU seat of government]. Now that the British Parliament is mostly a figure-head government, the British are losing time-honored legal traditions: *trial by jury*, *double jeopardy*, and *innocent until proven guilty*. European Union "Civil Law" violates the *rights* formerly guaranteed by British "Common Law."

THE EU BLUEPRINT

Canada, Mexico, and the United States are now following the European blueprint for regional government. The three countries are incrementally losing national sovereignty in exactly the same way European countries lost national sovereignty. Globalists want the economies of the three nations to be completely "*integrated*" by United Nations "*Free Trade"* treaties [WTO, NAFTA, CAFTA, SPP, etc.].

Without Congressional participation, the *"Security and Prosperity Partnership"* [SPP] was signed in 2005 by President Bush [U.S.], Prime Minister Martin [Canada], and President Fox [Mexico]. The agreement greatly expanded NAFTA, and created the NACC [*North American Competitiveness Council*] – composed of thirty corporate representatives [GE, Ford, GM, Walmart, Lockheed Martin, Merck, Chevron, etc.].

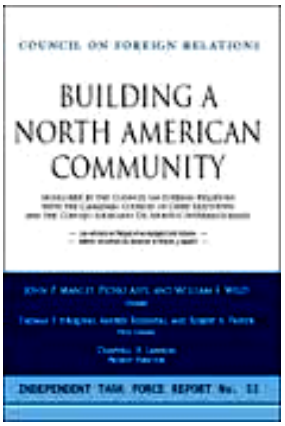
In the name of fighting *"terrorism"* and *"climate change,"* the United States, Canada, and Mexico have signed on for the following SPP policy goals:

- Regional law enforcement with outer security perimeter
- A tri-national *Homeland Security Force*
- Training programs for Mexican army. Joint training for law enforcement officials
- An expansion of NORAD with tri-national ballistics development
- Biometric identification and international tracking
- Biometric watch list systems to identify "*dangerous people"*
- Increased information and intelligence sharing at local and national levels
- Law enforcement and military organization through exchange liaison teams
- New sophisticated systems for tracking and storing intelligence
- Inter-operability between law enforcement and militaries of the three countries
- Increased labor mobility; Unlimited access to each other's territory
- A fully integrated North American Economic Space in which people flow freely
- A KYOTA-like "Clean Development Mechanism"
- A three-nation customs union
- A massive, continental superhighway system from Central America to Alaska
- A permanent tribunal for dispute-resolution similar to the WTO's World Court

The SPP "*decree*" usurps U.S. sovereignty by integrating the three countries into a single political and economic security bloc. SPP is the precursor to supra-national rule by the *U.N.'s North American Union* [like the European Union, African Union, Eurasian Union, Union of South African States, Asia Pacific Union, Union of Arab States, Union of South American Nations, etc.]. *By stealth,* the global elite are now bringing about the full economic and political "inter-dependence" of North America. Under regional *"Civil Law,"*

Canadians and Americans would lose *"Common Law"* legal traditions (Americans would lose unalienable rights protected by the Constitution).

London's "*Royal Institute for International Affairs"* [RIIA] was instrumental in establishing the European Union. The RIIA is the British counterpart to the *Council on Foreign Relations* [CFR] in New York, the *Mexican Council on Foreign Relations* [MCFR] in Mexico City, and the *Canadian Institute of International Affairs* [CIIA] in Toronto. Behind the scenes, the CFR [America], MCFR [Mexico], and CIIA [Canada] have been laying the groundwork for the *North American Union*.



In 2005, the *Council on Foreign Relations* published *"Building a North American Community."* The union of Canada, the United States, and Mexico would mean:

- A borderless North America
- Dissolution of national sovereignty
- Energy rationing
- Corporations in control of regional government
- Creation of a militarized *North America*.

NORTH AMERICAN UNION = INTERNATIONAL HOMELAND SECURITY

To avoid public opposition, the *North American Union* is 'off the radar.' However, North American defense systems are now being *integrated*:

NATIBO [North American Technology and Industrial Base Organization]: The program coordinates technology, infra-structure protection, and industrial base programs (military and commercial) between the United States Department of Defense and *Defence Nationalé Canada*.

Integrating technology, military, agency data: JIBWG [Joint Industrial Base Working Group]; DISDI [Defense Installation Spatial Data Infrastructure] *RAND Corporation*; DIBSSP [Defense Industrial Base Sector Specific Plan] defense industrial base, commercial industrial base, technology base; GIS [Geo-spatial Information System]

In 2009, the U.S. Congress reauthorized the *Defense Production Act* [DPA]. Under new provisions of the DPA, the "*Department of Homeland Security"* now serves to establish a fully *integrated* and *militarized* North American Union.

To accommodate this new *"International Order"* [*"U.S. National Security Strategy,"* May, 2010], Congress signed off on a *new* definition of *"U.S. National Defense."* The term "U.S. NATIONAL DEFENSE" is no longer strictly defined as "*the defense of the United States.*" According to the re-defined term in the DPA:

> **"U.S. NATIONAL DEFENSE" now includes "foreign military infrastructure; foreign energy production; international partnerships; and the *homeland security* of any foreign nation."**
> [DPA, Sec. 9, Plans of Action for National Defense, p. 14; section 801 j.]

Excerpts from the revised 2009 Defense Production Act [DPA]:

"This order delegates authorities for all resources and services to support national defense programs *as defined in this order*." *"National defense"* includes domestic and foreign military infrastructure... stockpiles, space, military production/ construction, energy production, energy construction, military use of civil transportation..." (EO 13603, p. 16659, Part VIII, Sec. 801[j]; DPA, Sec. 9, National Defense, p. 14; & Sec. 702). "National Defense includes emergency preparedness activities, disaster relief, and infrastructure... in the United States or *in any foreign nation."*

"Homeland Security" (Title III) includes *"military or infrastructure assistance to any foreign nation*;" *"the movement of individuals and property by all modes of civil transportation*;" *"technology, infrastructure, energy production in any foreign nation*" and *"other national defense programs and activities."* (DPA, Sec. 8, 702 amended, p. 13.)

"DPA contains its own authorization of appropriations — Funds appropriated for Title III are automatically authorized." *Whatever is spent for Homeland Security programs becomes public debt.* (Sec. 304, [g], p. 13) There is established in the Treasury of the United States a separate fund known as the *Defense Production Act Fund*. When any agreement entered into imposes any contingent liability upon the United States, such liability shall be considered an obligation against the Fund. (Sec. 304, DPAF a-f, p. 12.)

The Federal Reserve is fiscal agent for Homeland Security / Title III programs. Loans may be made without regard to the limitations of existing law (Sec. 302, (2), p.8).

Title III (*Homeland Security*) authorizes *unlimited* funding, independent of Congressional oversight. *Authority* extended under Title III does not sunset. These authorities enable Title III to change the domestic industrial base. Title III provides procurement authority. "*Title III provides a set of broad economic authorities found nowhere else in law....under both emergency and non-emergency conditions."*

"Free Trade" Treaties Violate the U.S. Constitution.

Internationalists within the State Department of the United States have signed trade agreements that threaten America's system of government. So-called *'Free Trade'* is actually *managed* trade by agencies of the United Nations. Today, world governing bodies such as the United Nations World Trade Organization [WTO] and the U.N. World Court regularly make decisions that over-rule and over-turn U.S. Supreme Court decisions and Supreme Court decisions of the fifty states.

U.N. "TRADE" OFFICIALS ARE DICTATING THE RULE OF LAW.

The World Court of the United Nations does not have authority over the courts of our sovereign nation. But today, elected officials are allowing U.N. tribunals to supersede the authority of our national and state courts, *with no private citizen participation*. Under the U.N.'s 1994 North American Free Trade Agreement [NAFTA], claims are now taken to special tribunals under the auspices of the U.N. Commission for International Trade and Law [UNCITRAL] or to the International Center for Settlements of Disputes [OCSOD] at the United Nations World Bank.

> The *Constitution* is the law of the land. Protection of unalienable rights [enumerated in the Bill of Rights] is an integral part of U.S. law. International trade agreements threaten the foundational principle of U.S. government.

CONSTITUTIONAL FACTS

The Constitution does not permit international trade treaties. The separation of powers gives the U.S. Congress power to *regulate commerce with foreign nations*. The House of Representative *alone* was given the power to regulate trade. The Founding Fathers gave treaty-making power to the Senate and the President. The Treaty Provision requires 2/3^{rds} Senate approval [Article II, Section 2]. Constitutional requirements for the separation of powers are being ignored.

Trade agreements are being *"fast-tracked"* and negotiated under *"Trade Promotion Authority"* [TPA]. The TPA permits the President the power to negotiate and word legislation so U.S. law can "*harmonize*" with the agreement.

No trade agreement should be above the U.S. Constitution. However, lawmakers have allowed trade agreements to have *"treaty status"* – legal force above the Constitution. Globalists regard U.N. trade agreements to have *the force of law* to override U.S. law. Whenever these international agreements contradict America's charter and by-laws, U.N. trade agreements now take precedence.

> *"Nothing can destroy a government more quickly than its failure to observe its own laws, or worse, its disregard of the charter of its own existence."* [Justice Tom Clark, U.S. Supreme Court, Mapp vs. Ohio, June 19, 1961.]

Free Trade Treaties have served to channel dollars to other countries to build infrastructure on foreign soil. The agreements favor multinationals that close U.S. production and move factories off-shore. U.N. treaties allow trans-nationals [*tech-giants, General Electric*] to shelter trillions of dollars outside of our borders.

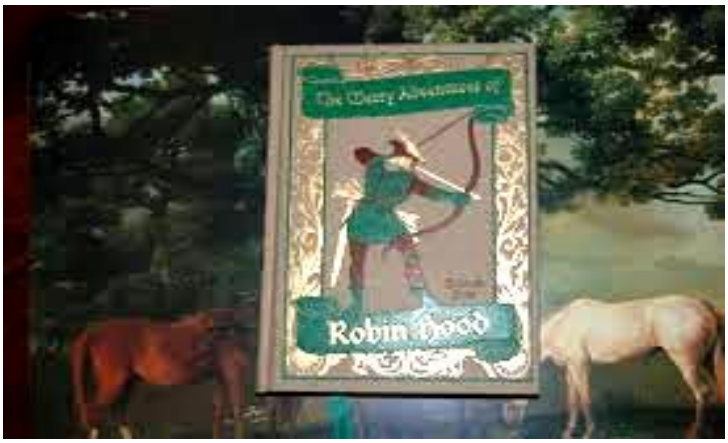
Remember Ross Perot's warning? He said if NAFTA passed, the manufacturing jobs going down the drain would make a *"giant sucking sound."* He was right. After the United Nations NAFTA agreement was signed, more than 50,000 manufacturing businesses closed [with an average of 500 employees each]. Industrial production declined for the first time since the 1930s. America lost 5.8 million industrial jobs (to compensate, millions of government workers were added). The decade 2000-2010 was the first time that more people were employed by the U.S. government than worked in manufacturing. (Three quarters of the jobs displaced by China were in manufacturing.) In George Bush's first term, high-tech manufacturing jobs disappeared. We now run trade deficits in high-tech products, too.

> "Free Trade" is *managed* trade by agencies of the United Nations. *Free Trade* really means loss of *independence*, loss of *sovereignty*, and a *weak* America. If you want the middle class in the United States to survive, vote against Republicans and Democrats who vote for Free Trade treaties (the supranational trade regulations are illegal - according to the Constitution).

Collectivism - Friend of the Über Rich

Are group rights more important than individual rights? Should the force of the state be used to manage economic activities?

Most young people would say *"Yes."* Thanks to an education system controlled by the über élite, the majority of students believe government should redistribute wealth for 'the greater good of the greater number.' This philosophy is called *Collectivism*.



But isn't Collectivism when the people own everything, and everyone is equal? No. *That* is what is advertised. But wherever state-enforced Collectivism has been tried, it has undermined the ownership of private property and lowered the living standard of the whole society.

In the 20th century, *Collectivism* was almost a *dirty word*. Under various forms of Collectivism, more than 100 million people were killed in China, the Soviet Union, and Eastern Europe; 100s more millions were reduced to subsistence-living. While those poor people were starving, *Individualism* had elevated average living standards in the West to levels never before attained.

> *Individualism is the doctrine that the state exists to protect the rights of the individual.** On the other hand, Collectivists believe individuals exist for the state. "Collectivism" is an 'umbrella term' for all brands of socialism; it means *centralized* state-control of the economy. And, as the government *grows*, the power of the super-rich *grows* (and the 99% *decline*). Here's how.

Government-enforced Collectivism redistributes wealth. In a country as large as the United States, this requires an enormous bureaucracy. In order to distribute benefits, goods, and services among society, all segments of the economy must be managed and regulated. In America, central planning started slowly, and grew. The scope of centralized management (by the unelected) is expanding rapidly. Click through the alphabet and see with your own eyes: U.S. Gov. Departments & Agencies. Click, and *scroll down* to see the recently created: EXECUTIVE BRANCH CZARS.

QUESTION: *How are all these massive programs funded?*
ANSWER: Money is created out of air [debt is *monetized* by the Federal Reserve].

FINANCING COLLECTIVISM

Tax revenues cover only a fraction of United States government expenditures; most of the nation's bills are paid with freshly created money [credit]. When government spends the new money, it has full purchasing power. But by the time it trickles down to you and everyone else, *the currency buys less*. The state takes away *value* from each dollar you own.

Money-printing is an indirect tax to
finance more and bigger government.

THE ECONOMICALLY VULNERABLE ARE HIT THE HARDEST.

Retirees and the poor are always the first casualties of a government financed by the printing-press. Money created out of thin air waters down the value of cash, savings, and benefits. Every year, people living on the margin need more assistance from government programs because their money buys less of the essentials – food, medical care, fuel, and housing. The hidden tax causes the poorest in society to lose their autonomy and become increasingly dependent.

COLLECTIVISM KILLS SMALL BUSINESSES.

Small businesses are devastated by the devaluation of the currency. (Costs for goods

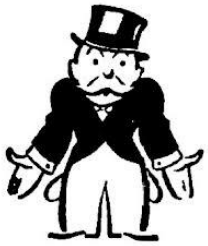
and services keep rising in relation to the eroding value of money.) The loss of purchasing power affects their bottom lines. Profit margins of 'Mom and Pop' enterprises shrink further because of increased central planning. Each new government regulation adds to their cost of doing business.

CENTRAL PLANNING ELIMINATES COMPETITION.

One after another: small, then medium, then large companies go out of business when the state picks the financial winners (by awarding government contracts to big companies). Small enterprises cannot compete with the overwhelming advantages enjoyed by politically well-connected corporations that are in-league with the state.

STATISM PRODUCES MONOPOLIES.**

Career politicians and bureaucrats establish power bases by doling out gifts to large corporations: special tax breaks, legal permits, government grants, and lucrative contracts. This leads to corporate-state monopolies. The consolidation of power evolves into a gradual transfer of management and production to multi-nationals. Under this system, the economy is eventually controlled by a small group of government-insiders.



WHY DO SO MANY ULTRA-RICH 'CAPITALISTS' PROMOTE COLLECTIVISM?

Because internationalists are *not* free-market capitalists. Big government is their friend. Collectivism provides the means for many of the *über rich* to develop trans-national monopolies. Globalists are monopolists. The little man above is from the board-game "Monopoly;" he is a caricature of banker J. P. Morgan.

Financial oligarchs consolidate power by forming alliances with governments. Behind the scenes, they wed their corporations to all levels of government in public–private partnerships. The *more* centrally managed the economy is, the *easier* it is for the oligarchs to eliminate competition.

'*Cartels'* eliminate competition by joining forces with the long arm of the law.***

"Communism represents a means of developing what we call a monopoly, that is, an organization of, say, a large-scale industry into an administerable unit… They [the élite] *will be the beneficiaries of it."* [Norman Dodd (Yale), 1953 Director of Congressional Research: 1982 G. Edward Griffin interview regarding U.S. Congress Special *Reece Committee* to Investigate Tax-Exempt Foundations.]

ANY 'ISM' but 'INDIVIDUALISM'

All brands of Collectivism serve the agenda of the über elite: *Islamism*, *NAZIism*, *Communism*, *Welfarism*, *Corporatism*, *Bolshevism*, *State Capitalism*, *National Socialism*, *Fascism*. It's *"all good"* for monopolists.

Collectivism *in any form* empowers the super-rich and destroys the middle class. Through America's system of education [UNESCO Common Core Curriculum], the oligarchs are erasing the principles of Individualism from public memory.

END NOTES

The über rich use their tax-free foundations to promote global Collectivism through agencies of the United Nations and through NGOs [*Non Governmental Organizations*]. Members of this tiny élite are rarely high-profile billionaires (such as Bill Gates and Warren Buffet). They are so powerful their names hardly ever appear on lists of the wealthiest people.

Definitions below are from Webster's *New Twentieth Century Dictionary*, unabridged, George W. Ogilvie, USA, 1904:

* INDIVIDUALISM: "The doctrine that individual freedom in economic enterprise should not be restricted by governmental or social regulation; *laissez-faire*. The doctrine that the state exists for the individual (to protect the rights of the individual) and not the individual for the state."

** STATISM: "The doctrine or practice of vesting economic control, economic planning, etc. in a centralized state government…."

*** CARTEL: "An association between financial interests for establishing a national or international monopoly by the fixing of prices, a trust."

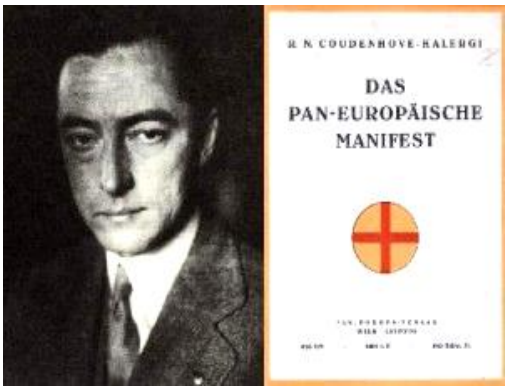
A direct "*Democracy"* is based on majority-rule. Under this form of government, individual rights are *subordinate* to the rights of the community. "*Group"* rights are paramount; and private property is *redistributed* for 'the greater good.' The government of the American "*Republic"* was laid on the principle of *unalienable* rights (individual rights such as private property).

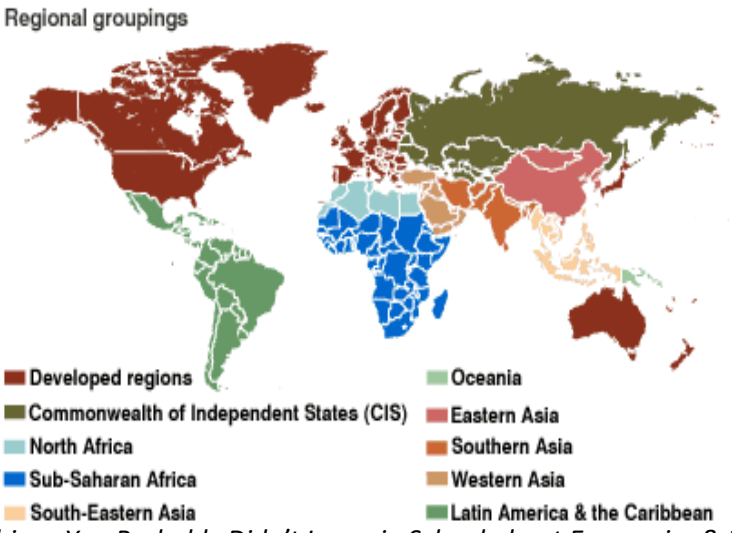
Building a Global Political Structure

The dream of a one-world government is as old as Genesis. There have always been ideologues and megalomaniacs who have plotted to build a global political state. All schemes for economic or political dominance have been planned behind closed doors.

In 1910, representatives of the world's largest financial interests held a secret meeting to create a global credit monopoly. With the passage of the 1913 Federal Reserve Act, the cartel formed a legal partnership with the U.S. government. Ten years later, Federal Reserve shareholders (such as Baron Louis Rothschild and Max Warburg) united with an élite group of intellectuals to develop a concrete plan for building a federated Europe. Leaders of the "*Pan-Europa*" movement laid the foundation for a United States of Europe.

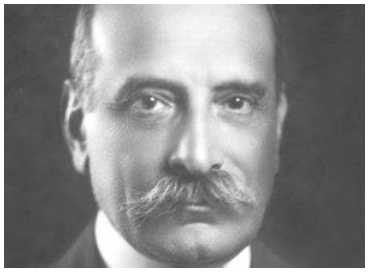
The symbol of *Pan Europa* is the sun cross [*sonnenkreuz on right*]. The organization was founded in Vienna by Count Richard von Coudenhove-Kalergi. Over many decades, European nations gradually relinquished sovereign independence. Today, Coudenhove-Kalergi is called the *Father of Multiculturalism* and *Founding Father of the European Union*.





A century ago, globalists such the Warburgs, the Rothschilds, the Fords, the Rockefellers, the Dulles brothers, the Carnegies, Nicholas Butler, and Coudenhove-Kalergi envisioned ten kingdoms within ten world regions. Today, their neo-feudalistic dream is the "Millennium Development Goal" of the United Nations.

***Ten World Regions*, 2005 United Nations Report: News.BBC.Co.UK.**



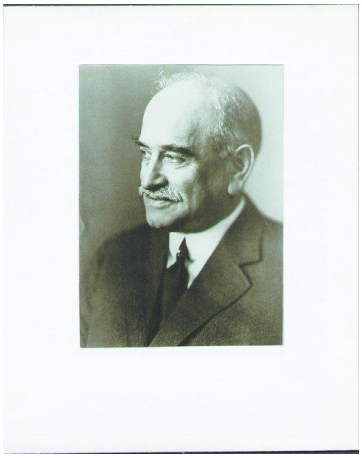
Paul Moritz Warburg was the architect and *Father of the Federal Reserve System*. Before becoming a U.S. citizen, he was the first President of the Federal Advisory Council of the Federal Reserve and set policy for the Board. Warburg was a member of the *Pilgrims Society* and founding Director of the *Council on Foreign Relations* [1921].

Paul Warburg was Senior Partner at *Kuhn Loeb & Co* [became *Shearson Lehman American Express*] and Chairman of the *Manhattan Co* [became *JPMorgan Chase*]. Along with brothers Max M. Warburg and Sir Siegmund Warburg, Paul Warburg was a Partner at *MM Warburg & Co* [part of German Empire's Imperial Investment Consortium, Reich Investment Consortium]. Max Warburg was Director of *Deutsche Reichsbank* (private central bank of Prussia). During WWII, *M.M. Warburg & Co* became a limited partnership and the Warburgs were silent partners.

M. M. WARBURG & CO
1798

UBS Warburg

WARBURG PINCUS
美国华平投资集团



Max Warburg

Erich M. Warburg (son of Max Warburg) began his career training as an apprentice in family banks in Frankfurt, Berlin, and the City of London at *NM Rothschild & Sons* and at *Brandeis, Goldschmidt & Co* (uncle). In New York, he worked at the *International Acceptance Bank* [established by Paul Warburg]. Erich Warburg was a Partner at *M.M. Warburg & Co* [Hamburg], *Warburg & Co* [Amsterdam], and founded the banking house of *EM Warburg & Co* [1937]. *EM Warburg & Co* is now *Warburg Pincus* [UBS owns the *Asset Management Division*; the current President of *Warburg Pincus* is former U.S. Treasury Secretary Timothy Geithner].

> The *Union Bank of Switzerland* [UBS] and *Swiss Bank Corp* [SBC] were the predecessors of UBS Warburg; UBS merged with SBC; *Crédit Suisse* was integrated into *SBC Warburg Division* [renamed *SBC Warburg Dillon Read*]; in 1995, *SG Warburg & Co.* merged with *Swiss Bank Corp.*

Until 1937, Max M.Warburg was a Director of IG FARBEN [*Die I.G. Farbenindustrie*]. It is estimated 2,000 corporations composed the manufacturing cartel after 1925.

After Adolf Hitler came to power in 1933, the IG FARBEN cartel was largely instrumental in building the NAZI war machine. Cartel agreements existed among Dow Chemical, General Electric [J.P. Morgan], Dupont, Alcoa, IBM, Ford Motor Co, Standard Oil of New Jersey [Rockefeller], American IG Chemical Corp, German Ford Motor Co AG, German Standard IG, German General Electric AEG.

> CARTEL: "An association between financial interests for establishing a national or international monopoly by the fixing of prices, a trust." [Webster's *New Twentieth Century Dictionary*, George W. Ogilvie, USA, 1904.]

Paul Warburg (and two other Directors of the Federal Reserve) sat on the Board of *American IG Chemical Corp (*wholly-owned U.S. subsidiary of IG FARBEN). IG FARBEN did not want to appear as the owner of its U.S. subsidiary. So the corporation used a Swiss intermediary [*IG Chemie*] and Dutch intermediaries as the corporate parents (the "owners") of IG FARBEN interests in the United States.

Original American IG Chemical Corp Directors: Carl Bosch [*German Ford Motor Co*]*;* Hermann Schmitz [IG Farben Supervisory, Finance Chief; Director, *Bank for International Settlements;* Director, *Deutsche Bank*]; Henry & Edsel Ford [*Ford Motor Co*]; H.A. Metz [Director, *Bank of Manhattan*- Warburg]; C.E. Mitchell [Chairman, *National City Bank NY* - Rockefeller]; *Federal Reserve* Directors: Paul Warburg, Charles E. Mitchel, and Walter Teagle [Standard Oil].

[Names of cartel members and original Directors of the U.S. subsidiary of IG Farben are from *Wall Street and the Rise of Hitler* by Dr. Prof. Antony Sutton (Research Fellow at Stanford University's Hoover Institution), pp. 46 & 47, '76 Press, Seal Beach, CA.]

IBM: *"I G Werk Auschwitz"*

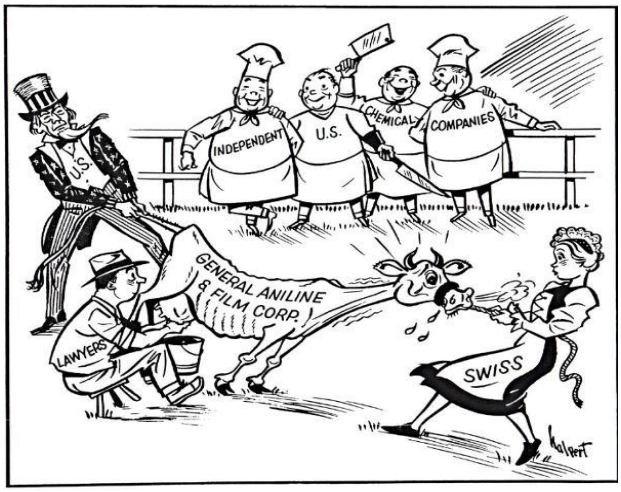
American *International Business Machines* [IBM] computerized "human resources" for IG Farben factories. In the 1940s, the prisoner identification system designed by IBM made the NAZI war machine more efficient. Berlin was able to centrally profile and track prisoners, and manage 100s of concentration camps (and sub-camps) using IBM's *"Hollerith numbers."* IBM's system of punch-cards with five-digit *Hollerith numbers* identified prisoners and indicated their skill-sets for slave-labor in factories. Germany leased IBM's punch-card machines; IBM's Warsaw facility provided technical support and machine maintenance. A *"Hollerith Büro"* was located within IG Farben's massive *"Auschwitz III"* factory complex "*Monowitz.*" [Edwin Black, *IBM and the Holocaust*, Feb. 2001, Article 663, *The Cutting Edge News.*]

IG FARBEN, Frankfurt am Main: Although whole sections of Frankfurt were destroyed by bombs during World War II, the giant office complex of IG Farben was not touched.

IG Farben-Dupont logo

Leading up to WWII, Dow Chemical and others developed nerve gas agents as military weapons [sarin, soman, tabun]. Following the war, several members of the boards of IG Farben and American IG Chemical Corp were convicted of war crimes at the Nuremberg Trials [1947 military tribunal]. Among other crimes, they were charged with the crime of using concentration camp labor to produce the very Zyklon B gas [cyanide] that was used to kill the prisoners in the camps.

American IG Chemical Corp was re-named *General Aniline & Film Corp* [1939, GAF]. In 1942, the United States seized the assets of General Aniline & Film Corp under the *Trading With the Enemy Act* (the assets were actually owned by IG Farben). After the Justice Department 'broke up' the U.S. subsidiary of IG Farben, Allen Dulles* [Rockefeller Foundation] personally represented IG Farben.



The name of the Swiss holding company for IG Farben and General Aniline & Film Corp *IG Chemie* was changed to *Inter-handel*. There were protracted negotiations between the U.S. Department of Justice and the Swiss representatives of *Inter–handel* about the disbursement of the company's seized assets. Three Swiss Banks represented *Inter-handel*: *Crédit Suisse*, *Union Bank of Switzerland* [UBS Warburg], *Swiss Bank Corp* [SBC].

When the Justice Department finally settled with *Inter-handel* [1963], the real benefactor was IG Farben (the real owner of the GAF shares). After the shares were liquidated in the largest competitive auction in Wall Street history [March 9, 1965], UBS Warburg acquired cash-rich *Inter-handel*.

Before banking deals were settled, the cartel re-merged. Names were changed, but the players did not change. In the 1960s, the re-merged conglomerate began large-scale production of poisonous substances, gases [*sarin, soman, tabun*], herbicides, riot control agents [tear gas, pepper spray], DDT, PCBs [1½ billion lbs], and "V-Series" chemical weapons: Agent Blue, Agent Purple, Agent White, and Agent Orange [the most toxic molecule ever synthesized/ babies are born with no limbs, multiple heads].

Today, the corporations are *partners* with a host of U.S. government agencies and the U.S. military. BASF SE: gas, plastics, oil, chemicals, agriculture [BASF-Syngenta]. Höchst AG is a pharmaceuticals conglomerate [Höchst/ Sanofi Group, Marion Merrell DOW, Hoechst Celanese, Roussel Uclaf, Celanese Americas Corp, Sanofi Aventis, Rhone Poulenc SA, etc.]. BAYER AG has 350 companies or more [Bayer CropScience, Aventis CropScience, Bayer-Monsanto, etc.].

END NOTES

* Before WWII, John Foster Dulles was an IG Farben Director. After the war, his brother Allen Dulles personally represented IG Farben and *Union Banking Corp* to regain NAZI assets the U.S. had seized during the war. The Dulles brothers worked with Erich Warburg at the law firm *Sullivan & Cromwell* on U.S.-German business [Warburg-Rothschild-Kuhn-Loeb interests].

John Foster Dulles was the Rockefeller family attorney and became the U.S. Secretary of State. [His grandfather John W. Foster and his Uncle Robert Lang were also U.S. Secretaries of State.] Allen Dulles created the CIA and was a Director of *Schroder Rockefeller Co, J Henry Schroder Banking Corp, Schroder Trust*.

Baron Kurt von Schröder [*J Henry Schroder Banking*, *Schroder Rockefeller Co*, etc.] was a NAZI banker. After being convicted at his Nuremberg trial, Schröder served a prison term for war-crimes. Before WWII, he was a Director of *International Telephone & Telegraph Corp*, and the *Bank for International Settlements* [BIS, Basel, Switzerland]. Baron von Schröder was half-owner and Director of the *Hamburg-Amerika Line*.

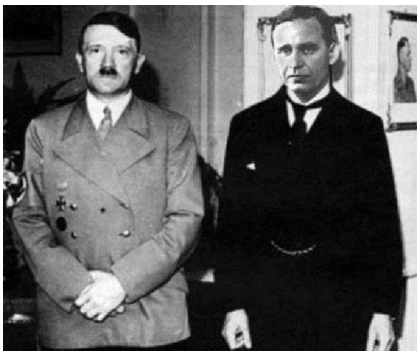
BROWN BROTHERS HARRIMAN

George Herbert (Bert) Walker (grandfather of former CIA Director George Herbert Walker Bush) was President of *WA Harriman & Co* during the 1920s [Directors included W. Averill Harriman, Percy Rockefeller, E. Roland (Bunny) Harriman]. In 1926, Prescott Sheldon Bush (father of George H. W. Bush) became Senior Partner at the firm (Prescott Bush was Walker's son-in-law).

WA Harriman & Co became *Brown Bros Harriman* when the company merged with *Brown Brothers & Co.* [The old London branches of firm are *Brown Shipley & Co* and *Alex Brown & Son.*] From 1920 to 1940, *Harriman* owned 50% of the *Hamburg-Amerika Line* [Harrimans, Walker, Rockefeller, Bush]. *Brown Bros Harriman* went into partnership with industrialists in Germany [Thyssen-Flick German Steel Trust]. Together they established *Union Banking Corp* [Director and main share-holder, E. R. Harriman; Prescott Bush, Senior Partner].

The Dulles brothers were Senator Prescott Bush's Wall Street attorneys. In the middle of World War II, the bank's capital stock was seized by the *Alien Property Custodian* [APC] under the "*Trading with the Enemy Act.*" After Fritz Thyssen died, the U.S. Department of Justice [Office of Alien Property] inexplicably released all *Union Banking Corporation* assets to *Brown Brothers Harriman.*

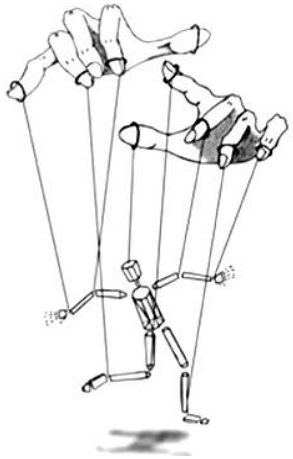
Allen Dulles



On left, Allen Dulles, Office of Strategic Services (CIA forerunner).
On right, Adolf Hitler with future Senator Prescott Bush.

In 1976, the U.S. House of Representatives investigated the ownership of the Federal Reserve and published *"A Study of Corporate and Banking Influence."*

Public-Private Partnerships: Unholy Unions.



It seems a small group of monopolists pull the strings to the world economy. The puppet-masters share an Old World ideology called *Collectivism*. Around the globe, they avoid competition by forging partnerships with governments. The enforcement authority of the state provides them with a business advantage.

The wedding of corporate entities to the power of government is called *Corporatism* ["*The Third Way"*]. By this unholy union, the state picks the financial winners. Public-private partnerships are a form of government coercion. The government tramples private property rights by forcing the transfer of tax money into the coffers of favored enterprises (or it gives them special exemptions from taxes). Through the growth of Corporatism, wealth and power are consolidated, the middle class declines, and puppet-masters prosper.

Public-private partnerships enable the financial élite to gain monopolistic control of markets. In America, trans-national corporations have formed partnerships with intelligence agencies, the U.S. Treasury, Departments of Defense, Education, Agriculture, Homeland Security, and many other federal agencies. Monopolies created by public-private partnerships gradually *evolve*. By the steady transfer of economic power to multinationals, unelected insiders gradually *become* the state.

> I was a teenager when I first started reading what collectivists believe in the *Council on Foreign Relation's* publication called "Foreign Affairs."

FOREIGN AFFAIRS

Published by the Council on Foreign Relations

In those days, the *Council on Foreign Relations* [CFR] 'flew well below the radar.' Until about twenty years ago, the CFR was almost invisible. Contributors to "Foreign Affairs" quietly discussed their foreign policy goals. Over the decades, they outlined the steps to "*Inter-dependence-Sovereignty"* under United Nations governance:

- Creation of ten supra-national kingdoms [European Union, Asia Pacific Union, African Union, North American Union, Union of South American Nations, Union of Arab States, Eurasian Union, Union of South African States, etc.]
- Energy rationing [smart meters, smart grids, smart cars, smart homes]
- U.S. disarmament: U.S. military power transferred to U.N. [disarmament of private citizens via U.N. trade treaties]
- International military forces [NATO, U.N.]
- World Court [International Court of Justice at The Hague]
- U.N. central banking system [IMF, World Bank]
- World taxation [carbon tax to redistribute wealth of industrialized countries]
- Single digital currency via *blockchain*™ technology [new monetary unit 2018]
- UNESCO Common Core Curriculum [training for uniform *human capital*]

National independence, national borders, and *nationhood* have no place in this feudalistic scheme. Select CFR members seek the destruction of U.S. sovereignty through international law. Before David Rockefeller died, he became outspoken:

> "Some even believe we are part of a secret *cabal* working against the best interests of the United States… conspiring with others around the world to build a more integrated global political structure – one world, if you will. If that's the charge, I stand guilty, and I am proud of it."
>
> "… this present window of opportunity during which… *interdependent world order* might be built will not be… open for too long. Already there are powerful forces at work that threaten to destroy all of our hopes and efforts to erect an enduring structure…." [David Rockefeller, *Memoirs*, p. 406, Random House, New York, 2002; David Rockefeller, Annual Ambassador's Dinner, United Nations Business Council, New York, September 14, 1994.]

An epic battle is raging in the United States between opposing ideologies. America's Founding Fathers understood Collectivism. They designed the U.S. Constitution to protect *individual* rights – by limiting the power of government. A *cabal* of closely-knit conspirators believes United Nations government should have omnipotent power. The roots of their scheme can be seen in this image of the ancient Tower of Babel. The left half of the image is from a very *old* painting; the right half of the image is of their *new* "Tower Building" at the European Union [EU] Parliament in Strasbourg, France.

GMOs and De-Population

For nearly 100 years, an elite group of social engineers have funded "Eugenics" research. Their ultimate goal is a drastic reduction in the population of the world. These misanthropes operate in the shadows through tax-exempt foundations, U.N. agencies, NGOs [Non-Governmental Organizations], and the CFR [Council on Foreign Relations]. CFR Director Henry Kissinger worked many years for the *Rockefeller Brothers Fund*. As President Nixon's Advisor, Kissinger released a report outlining a strategy to defeat the "*problem*" of the growing world population.

The December 10, 1974 confidential report was declassified in 1990. Henry Kissinger wrote: *"No country has reduced its population growth without resorting to abortion."* His long-term plan to control birthrates was to *reduce the fertility* of global populations via the United Nations. The following is a summary of recommendations Kissinger made in the 1974 "*National Security Memorandum 200*:"

- United Nations agencies to develop planning systems most conducive to reducing fertility;
- U.N. agencies to provide birth control, pharmaceuticals, and abortion to all fertile couples at the earliest possible time;
- U.S. Government to develop low-cost and efficient fertility control methods;
- U.S. Government to fund human reproduction research.

Kissinger's report identifies "*overpopulated*" countries. He suggested reducing aid to those nations that did not implement U.N. strategies to reduce birthrates; and explored the use of *food* as a means to control human reproductive capacity.

["CONFIDENTIAL: *The 198-page attached report is not published*," Henry Kissinger, December 10, 1974, NSSM200, National Archives, Nixon Presidential Materials, NSC Institutional Files, Box H-204; *National Security Study Memorandum 200: "Implications of Worldwide Population Growth for United States Security and Overseas Interests."*]

CGIAR RESEARCH CENTERS

The Rockefeller Foundation, Ford Foundation, and World Bank [U.N.] established top-secret centers for genetic research. Today, genetic modification research (genetically engineered food, genetically modified organisms), cloning research, and research on reproduction and fertility are conducted in at least fifteen world centers.*

Genetic engineers use biotechnology to modify the DNA of mammals, fish, micro-organisms, insects, plants, and birds. They produce new combinations of genetic material by forcing the genes from one species into the DNA of another species.

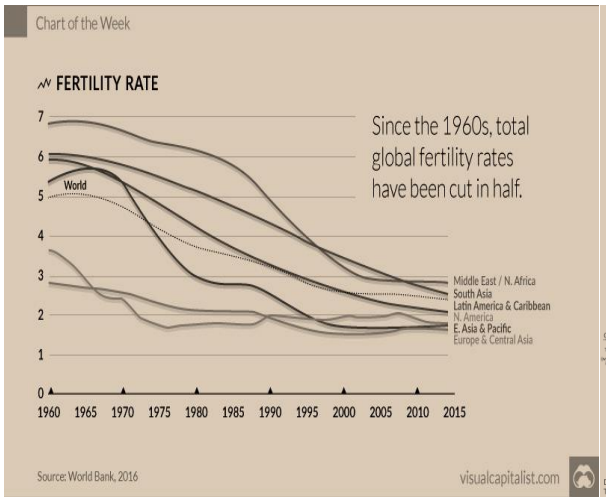
GMOs Genetically Modified Organisms • GE FOOD Genetically Engineered Food

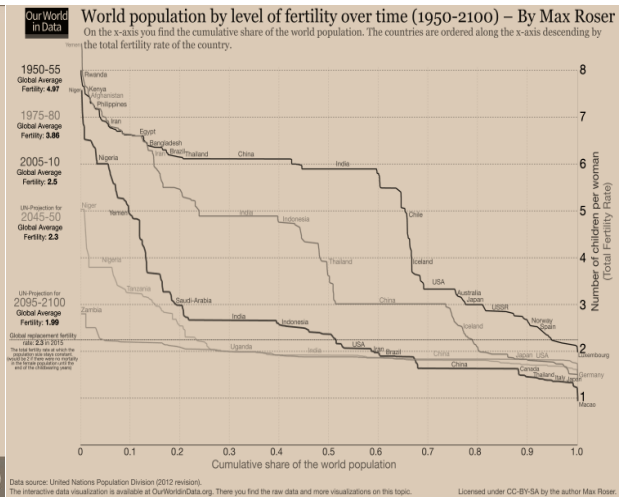
Genetically engineered seeds are *patented*. A giant manufacturing network owns patents on the new genetic combinations produced at research centers. BAYER AG collaborates with 200 corporations [North American Corporate Sustainability Community Council, World Business Council for Sustainable Development]. BAYER AG: (*Bayer-Monsanto* owns *Aventis Crop Science* and *Bayer Crop Science*): BASF – SYNGENTA [*Syngenta Crop Protection*], *Cargill*, *DOW Agro Sciences*, *AgroAmerica*.

> The largest seed manufacturer in North America is the "LGT GROUP" [*Dresdner Bank Ltd*, Switzerland*; LGT Bank Österreich*; *LGT Bank Deutschland & Co; LGT Ltd*., Middle East]. LGT Venture Philanthropy and Bayer AG are "UNEP PARTNERS" [United Nations Environment Programme].

Genetically modified *organisms* are the source of genetically modified food. When animals eat crops produced from genetically modified seeds, the DNA of the animals is changed. When humans eat GMO products *or* the animals that ate GMO crops, their human DNA is changed, too. It is estimated that more than 80% of the U.S. food supply is contaminated with GMOs.

Is there a direct connection between infertility and GMOs? YES. GMOs are a direct cause of infertility. Every *independent* study conducted on the impact of genetically modified food shows that GMOs directly cause infertility.** The fertility rate in the U.S. has dropped significantly since Americans began consuming genetically modified crops. One in six married couples who want a child *cannot* conceive a child.





USAID FROM THE AMERICAN PEOPLE

ISAAA INTERNATIONAL SERVICE FOR THE ACQUISITION OF AGRI-BIOTECH APPLICATIONS

The U.S. government has formed partnerships with corporations to advance "*sustainable agriculture*" (*worldwide use of GMO seeds*).

The *Rockefeller Brothers Fund* promotes Genetically Engineered products to developing countries through their organization called ISAAA. ISAAA transfers GMO products and biotechnology by facilitating partnerships between PARTNERS and DONORS: BAYER-MONSANTO is a *Partner* organization with *Donor* organizations such as the U.S.D.A. [U.S. Department of Agriculture], the U.S. Grains Council, and **USAID** [United States Agency for International Development].

GLYPHOSATE

The patented seeds are genetically modified to resist herbicides that contain glyphosate. Glyphosate is toxic to vegetation. The chemical kills micro-organisms by inhibiting the pathway of the enzymes [proteins] necessary for organisms to grow [plant and animal]. GMO seeds can grow in the presence of the poison.

Bayer-Monsanto seeds are genetically modified to resist Bayer-Monsanto herbicides. Seeds modified with the *"LibertyLink"* trait are combined with Bayer's "*Liberty"* herbicide. Seeds modified with the *"Roundup Ready"* trait are glyphosate-saturated with Monsanto's *"Roundup."* Glyphosate inhibits the enzymes in weeds surrounding GMO plants. When an area is sprayed, nothing can live but the genetically modified, glyphosate-resistant products. Glyphosate creates a *green desert* by killing every other organism in the nutrient-starved soil.

AgroAmerica Monsanto Cargill syngenta BASF The Chemical Company

Herbicides containing glyphosate cannot be washed off (the chemical is inside the plants). According to research, *residues* of glyphosate are found in about 80% of our food supply. About 700 products sold in the U.S. contain glyphosate [some Frito-Lay products, some vaccines, pesticides, herbicides, cotton *feminine products*, etc.].

> Glyphosate disrupts normal body functions and manifests slowly over time. The poison disrupts DNA transcription, damages cellular systems, induces hormonal imbalance, and induces chromosomal damage during pregnancy. Glyphosate is linked to infertility, autism, Parkinson's, cancers, auto-immune disease, etc.

What does *"sustainability"* mean to ONE-WORLDers? According to all *independent* studies, GMOs can cause holes in the gastrointestinal tract, *immune system failure*, damage to *organs*, breast/ prostate *cancer*, *sterility/ infertility*.

Are GMOs and glyphosate in the world's
food supply a plan to de-populate the earth?

END NOTES

* *Consultative Group on International Agricultural Research*; *CGIAR Research Consortium of International Agricultural Research Centers*; the *International Service for National Agricultural Research* – ISNAR is located in The Hague.

** *Seeds of Death*: https://www.youtube.com/watch?v=a6OxbpLwEjQ (Dupont-Monsanto commercialized the "*epicyte gene*." If eaten in any product, the gene causes infertility.)

IG FARBEN became the largest manufacturing cartel in the 1920s. After WWII, the name "IG Farben" was dropped, but the cartel remained in-tact and the manufacturers reappeared [e.g.: *Bayer/Monsanto* was *FARBENfabriken/MobayChemical*].

FOOD CONTROL = POPULATION CONTROL.

Mao Zedong used food as a *weapon* against millions of Chinese. In *Mao's Great Famine* by Frank Dikötter, the professor makes the crucial distinction between people starving to death and people *being* starved to death. Scores of millions did *not* die because of crop failures and food shortages. They were deliberately starved to death. According to the renowned scholar, the *same regime* is very much in power today: **MAO'S GREAT "FAMINE:" Part 1 of 2**

Below: Henry Kissinger with Mao Zedong; David Rockefeller with Zhou Enlai.

The CIA's Old Play-Book

We are all familiar with the names of history's most cruel or most powerful dictators. But since the rise of empires, there have been *clandestine* groups who have promoted their interests in the shadows. In every generation, each small cadré has been united by the same cherished dream.

In the United States, 108 members of an esoteric cabal formed the *Council on Foreign Relations* [1921] to direct United States foreign policy in the direction of global governance. A century ago, they planned *"Pan Europa"* (the united states of Europe). Today, the federation of Europe is known as the *European Union*. The *"League of Nations"* [1920] was their first attempt to establish one-world government. Today, the global political structure is known as the *United Nations*.

Allen and John Foster Dulles were both members of the *Council on Foreign Relations*. The brothers promoted planetary union and an end to national borders. In 1942, John Foster Dulles (Rockefeller family attorney) made the following recommendations for a New World Order [Federal Council of Churches National Study Conference, *Wesleyan University*, Ohio, 1942]:

- World government with delegated powers
- Immediate reduction of national sovereignty
- International control of all armies and navies
- One international bank
- Universal monetary system
- Worldwide freedom of integration
- Even distribution of world's natural wealth

Their global political structure began to take shape with the establishment of the World Bank and the International Monetary Fund [U.N. corporate banking]. The "U.N. Monetary and Financial Conference" at Bretton Woods [1944] marked the *beginning* of global "*inter-dependence"* and economic "*integration*;" Treasury Secretary Henry Morgenthau, Jr. said the establishment of the U.N. banking system marked the beginning of the *end* of "economic nationalism" in the United States.

In 1953, John Foster Dulles became U.S. Secretary of State. His brother Allen Dulles became the Director of the Central Intelligence Agency [CIA]. In 1967, the intelligence agency completed a blueprint for total global management. In the CIA analysis, it was concluded that *war* is absolutely necessary for *full-spectrum dominance*. In order to control the populations of the world, Dulles and his cohorts discussed the possibility of using *un-conventional* warfare. The CIA report is now de-classified [C.I.A. Document Number (FOIA) /ESDN (CREST): CIA RDP88-01350R000200370012-1].

According to their "Report from Iron Mountain," it would be possible to achieve and maintain international order by the *invention* of mega-threats to the planet.

IRON MOUNTAIN®

"THE REPORT FROM IRON MOUNTAIN"

Through geo-engineering, conventional warfare among nations would be replaced with SILENT war.

A SILENT WAR is now being waged. Weaponry is nano-technology, weather modification, biological and electro-magnetic warfare.

The evidence of this SILENT WAR is in plain sight. Look up in the sky. Instead of clear blue, you will see dingy-white cloud-cover or traces of a grayish haze. *Why*?

• Military ops
• Biological ops
• Electro-magnetic ops
• Sophisticated surveillance
• Modification/control of weather
• Geophysical/planetary change & control

Metallic nano-particles suspended in air columns produce electromagnetic weapons (high-intensity microwaves, human frequencies). The aerosol operations conducted 24/7 via tanker-jets are from HAARP ["High Frequency Active Auroral Research Program"]. This new 'Manhattan Project' is causing cancers, neurological disorders, and respiratory diseases – and is wreaking havoc on the environment and weather.

Today, we are told the climate crisis requires *collective* action – that national independence is no longer viable. The United Nations *alone* can save the world from an apocalyptic future. According to Vice President Al Gore, the survival of planet earth depends on a *wrenching transformation of society."* [Al Gore, *Earth in the Balance*, p. 274, Houghton Mifflin, 1992]. The U.N. action-plan for Century 21 is U.N. AGENDA 21.

RE-BRANDING WORLD GOVERNMENT

In 1991, President George H. W. Bush told Congress: *"What is at stake…is a big idea: a New World Order…."** This term is now passé. *"New World Order"* has been re-branded as *"Sustainable Global Governance."* In order for life on planet earth to be *sustainable*, Americans must learn to live in a society regulated by the United Nations

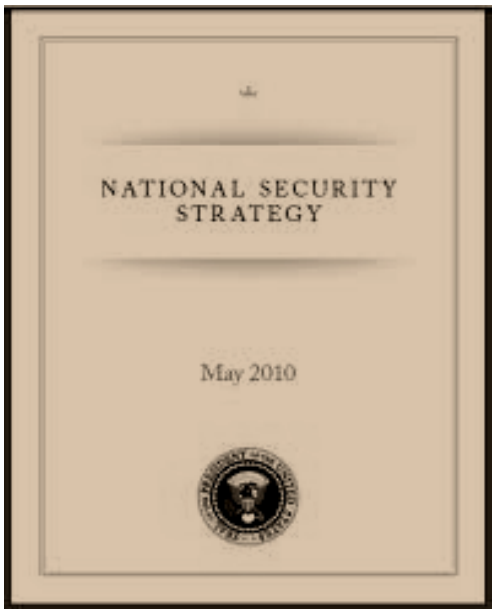
The UNESCO Common Core Curriculum is training an entire generation in "*global citizenship.*" The three 'Es' of *global citizenship* are Economy, Ecology, and Equity:

- The West is endangering the carrying capacity of the planet.
- The earth cannot tolerate current industrial activity.
- The world is inter-dependent; and resources are scarce.
- Wealth must be redistributed and shared equally.
- The West must be synthesized with the East.

SUSTAINABLE DEVELOPMENT

Sustainability will require a profound re-orientation of the middle class. *What is Un-sustainable?* Western lifestyles: unrestricted private property, suburban housing, high meat consumption, appliances, air conditioning, irrigation, and the use of 'fossil' fuels.

If U.N. Agenda 21 is not stopped, every industry and all aspects of life will be affected by "*sustainable development*" (economic regulation and population control). *Already*, U.N. mandates are being imposed at all levels of government [including your town council]. National comprehensive planning and growth management [smart growth] is being coordinated by 'experts' to prevent 'misuse' of resources [*land cannot be controlled by individuals; 'open spaces' and farms must be owned collectively*].



In 2010, the United States State Department published the "National Security Strategy." QUESTION: *What is the State Department's objective for National Defense?* ANSWER: *"Promoting a Just and Sustainable International Order."* The State Department goal is global governance by the United Nations.

According to the official State Department report, the development of "cyber security" is paramount to the U.S. "National Security Strategy:" Many pages were devoted to the *"development of norms for acceptable conduct in cyberspace."*

*In the future, "*STAKEHOLDERS*"* will decide which speech is legal; and *you* are not a stakeholder [names of "*Stakeholders*" in the End Notes].

PRIVATIZING CYBER-SPACE: The U.S. State Department's *"multi-stakeholder model of internet governance"* is a plan to privatize cyber-space. Internet governance by corporate stakeholders is called **"***Inter-Dependence Sovereignty."*

> "Inter-dependence Sovereignty: *The ability of public authorities to regulate the flow of information, ideas, goods, people, capital, etc. into and out of borders.*" ["Toward a Single Global Digital Economy," *First Report of the Aspen Institute IDEA Project*, 2012.]

A SINGLE GLOBAL DIGITAL ECONOMY

Stakeholders want to control the world's natural wealth: land, seas, drinking water, and food supply. They are writing cyber laws for the regulation and control of everything — digital money, information, trade, ideas, products, and people: *"This way, the Internet would ensure a strong impetus to efforts to advance the United Nations 2030 Agenda for Sustainable Development."* [*The First Report of the Aspen Institute IDEA Project, 2012,* "Toward a Single Global Digital Economy."]

Government under U.N. "Civil Law" (rather than U.S./ British "Common Law") would mean the loss of individual rights, the end of national sovereignty, and absolute United Nations power:

- U.N. control of all weaponry [national disarmament, control of "Weapons of Mass Destruction"]
- U.N. control of internet [cyber security]
- U.N. digital currency [cash to be abolished]
- Biometric ID system-IBM [healthcare, education]
- U.N. management of global economy [no 'state' would be allowed to control its own economy]

END NOTES

* *"What is at stake… is a big idea: a New World Order… a shining purpose, the illumination of a Thousand Points of Light."* [Former C.I.A. Director President George H. W. Bush, *State of the Union Address*, Jan. 29, 1991.]

NEW WORLD ORDER = "NOVUS ORDO SECLORUM"
SECLORUM [LL *sæcularis*] "*Pertaining to the world"*

Taxpayers are funding the lion's share of the costs to build the global political structure through Non-Governmental Organizations [NGOs] such as the *"National Endowment for Democracy"* [funded by Congress] and the *"Institute of International Education"* [I.I.E.].

Stated objectives of the Institute of International Education:

"To prepare a new generation for global citizenship"
"To achieve the UN's Millennium Development Goals"

The Institute of International Education [is a public- private partnership. The following "**STAKEHOLDERS**" are key I.I.E. Partners and Sponsors: *Carnegie Foundation*, *GE Foundation*, *Verizon*, US Dept of the Treasury, *Chevron Corp,* US Dept of Education, *Mattel Foundation*, the Ford Foundation, US Department of Defense, *Goldman Sachs* Program, US Department of State [*"Project Atlas Builds a global community of data*"], *Lockheed Martin Foundation*, *World Bank*, *Xerox*, US Dept of State BECA, *JPMorgan Chase*, the U.N. Foundation, *Microsoft*, US National Security Program*, Wells Fargo,* NEA Development Corp, *Alcoa Foundation,* UNESCO *Fund for the New American Century, Cisco,* the *Open Society Institute, Cargill Global Scholars, Andrew Mellon Fund*, *Booz Allen Hamilton* (*Carlisle Group*), the *Rockefeller Foundation*, **USAID** [U.S. Agency for International Development], and the Director of U.S. National Intelligence.

The Institute of International Education was founded in 1919 by Nicholas M. Butler [*Pilgrims Society*, CFR Director, President of Carnegie Endowment]; Stephen Duggan [CFR Director]; and Elihu Root [honorary CFR President]. Zbigniew Brzezinski [CFR] is an honorary Trustee; Henry Kissinger [CFR, *Pilgrims Society*] is on the Executive Committee. Allan Goodman [CFR] is the CEO and President of I.I.E. (and consultant to the *U.S. Information Agency, IBM,* the *Ford Foundation,* and to the President for the CIA Director).
